Independent arc sensors provide dependable arc detection.

VSi™ features X-Mode and three independent arc sensors for unsurpassed arc detection. X-Mode prevents sunlight from darkening the lens before welding starts and low-amperage lens opening from obstructed sensors.

Integrated grinding shield provides impact protection and a clear view for grinding.

Auto-on/off power control triggers lens at the strike of an arc.

Meets ANSI Z87.1+ and CSA standards.

Optional helmet lighting accessory kit includes two lights (one for each side) and all required mounting hardware.

Auto-darkening lens is warranted for two years.
