Auto-Continuum™ Systems

Industrial Automation
- Construction equipment
- Automotive components
- Recreational vehicles
- Farm machinery
- Office furniture
- Mining machinery

Processes
- Advanced MIG processes:
  - Versa-Pulse™
  - Accu-Pulse® MIG (GMAW-P)
  - RMD®
- MIG (GMAW)
- High-deposition MIG (GMAW)
- Flux-cored (FCAW)

Input Power
- Auto-Line™ 230–575 V
- 3-phase, 50/60 Hz

Rated Output at 104°F (40°C)
- 350: 350 A at 31.5 V, 100% duty cycle
- 500: 500 A at 39 V, 100% duty cycle

Output Range
- 350: 20–400 A, 10–44 V
- 500: 20–600 A, 10–44 V

Quick Specs

Take your welding to the next level.

Next generation automation welding solution delivers advanced arc performance to improve throughput and weld quality.

The Auto-Continuum system features an adaptive arc with less spatter and improved gap handling, providing increased travel speeds and high-quality welds on a variety of base materials. Simple integration with fixed and flexible automation systems.

Insight

Integrated Welding Intelligence™ solutions. Delivers information to measure and improve your welding operation. See page 4 for more information.

Power source is warranted for three years, parts and labor. Original main power rectifier parts are warranted for five years.
Auto-Continuum™ System

More power. Better reliability.
For demanding industrial applications.

Power source design

Smart and powerful digital design has the fast response needed to deliver the most stable welding performance for better welding results.

Developed as a platform to meet current and future needs with integrated expansion capabilities.

Produces more power at higher duty cycles and temperature ratings than competitive models.
  • More power maximizes reliability in demanding automation applications by keeping all internal components operating cooler regardless of the jobs to be done.
  • More power ensures better welding results regardless of application or weld process.

Auto-Continuum 350: up to 26% more weld power
11,000 watts versus 8,700 watts = 2,300 watts more!
(Continuum: 350 A x 31.5 V at 100% duty cycle = 11,000 watts)
(Competitor: 300 A x 29 V at 100% duty cycle = 8,700 watts)

Auto-Continuum 500: up to 18% more weld power
19,500 watts versus 16,425 watts = 3,075 watts more!
(Continuum: 500 A x 39 V at 100% duty cycle = 19,500 watts)
(Competitor: 450 A x 36.5 V at 100% duty cycle = 16,425 watts)

Wire drive motor assembly

Low-inertia motor provides faster response for the best arc starts with the least amount of spatter.

Reduced-weight design allows for quicker point-to-point arm movement and provides improved servo motor life.

• Easy communication from robot and power source
• Wire drive motor assembly design utilizes common Miller mounting configurations
• Designed for easy integration with fixed and flexible automation systems
• Integrates with major industrial robot brands
• Simple retrofit to existing automation systems

Easy to set up and install
Webpages are an easy way to initialize and configure your automation welding system.

To use the webpage interface connect to the Auto-Continuum power source one of three ways:

- Connect to factory network via Wi-Fi
- Connect to factory network via Ethernet cable
- Direct connect to PC via Ethernet cable (see page 11 for recommended Ethernet cable)

System status / event logs
- Access system logs to help identify weld cell issues
  (Example: can identify weld cable degradation)

Configure your robot settings to establish communication. Options include:
- EtherNet/IP™
- DeviceNet
- Analog
Transform data into actionable information that drives continuous improvement. Learn more at MillerWelds.com/insight

**Insight Core™ (Standard)**

Simplified, Internet-based welding information solution that reports cell productivity and weld parameter verification.
- Provides basic production metrics such as amps, volts, wire feed speed, arc on time and arc on time percentage

**Insight Centerpoint™ (Optional)**

Advanced, real-time feedback solution to ensure consistent weld quality.
- With built-in features like Part Tracking™ to detect a bad weld and Insight Reporter for preconfigured reports and management charts, Insight Centerpoint can help reduce rework costs and improve quality.

Part Tracking actively detects a bad weld when it happens to reduce rework and improve quality.
- Detected weld errors due to poor parts fit-up, bent torch (due to colliding with a part), part loaded incorrectly, etc.
- Centerpoint will shut the system down either during or after the weld, to alert and direct the operator to which weld(s) are out of parameter, reducing inspection time
- Repair can be done at the weld cell before paint, which significantly reduces the cost of rework and improves overall parts quality

Overall Equipment Effectiveness (OEE) — Centerpoint can provide data on weld cell efficiency.
- Robot on/off time
- Open cell door time tracking
- Duration of off time (due to parts shortage, fixture issue, etc)

Cost of a missed weld or defect

**Flexibility**

**Fleet standardization.** Auto-Continuum can be used for both automation and hand-held applications.  
*Note: To convert Auto-Continuum for manual weld applications, order feeder base (301431) and wire feeder drive (301216).*

**Adaptable** to a variety of fixed and flexible automation configurations and requirements.

**Welding Intelligence.** Improve your welding operations by increasing productivity, improving quality and managing costs with Insight Core™ (standard) and Insight Centerpoint™ (optional) welding information management systems.

**Easily add new processes and custom programs** via the USB interface.

**Parameter flexibility** allows the system to be set for voltage and wire feed speed control, or for voltage and amperage control.

---

**Communication protocol options:**
- EtherNet/IP™
- DeviceNet
- Analog

---

**Automation applications**

**Hand-held applications**
Each weld program is designed for specific wire and gas combinations — for optimized performance.

Low spatter levels at high travel speeds is a requirement in automated welding. The Versa-Pulse process precisely controls the welding arc, significantly reducing spatter size and quantity over traditional processes.

The adaptive arcs of Versa-Pulse™ and Accu-Pulse® instantly make adjustments to handle weld tacks, large gaps and inconsistent parts. The result is higher quality welds and fewer weld defects.

Versa-Pulse™
- Fast, low-heat, low-spatter process — for high-speed automation on materials 1/4 inch (6.35 mm) and thinner
- Great for gap filling
- Shortest arc length/lowest pulse voltage for lower heat and lower spatter at higher speeds

Accu-Pulse®
- The most popular process for majority of industrial welding applications
- Most adaptive arc on 16 gauge (1.6 mm) and thicker
- Designed for all weld positions

RMD®
- Lowest heat process, best for gap handling
- Limited travel speed

High-deposition MIG
- Higher deposition rates than standard spray transfer on thicker materials
- Designed for welding applications in which spray transfer is preferred

MIG (short circuit)
- Lower spatter than traditional MIG welders
- Better arc performance with silicon bronze and coated materials

Auto-Continuum™ System Features

Tru-Feed™ technology provides precise feeding operation for stable arc performance.
- Low-inertia motor provides faster response for the best arc starts with the least amount of spatter.
- Balanced-pressure drive-roll design and tensioners feed wire in its truest and straightest form for consistent feedability.

Spring-loaded Accu-Mate™ connection prevents the gun from being pulled loose.

Quick-change dual-bearing drive rolls give you more consistent wire feeding.

Drive rolls and guides are common with other Miller industrial feeders (use existing, not new parts).

Inlet guide installation is toolless.

Wind Tunnel Technology™: Internal air flow that protects electrical components and PC boards from dirt, dust, debris — greatly improving reliability.

Fan-On-Demand™ operates only when needed reducing noise, power consumption, and the amount of airborne contaminants pulled through the machine.

Auto-Line™ power management technology allows for any input voltage hook-up (230–575 V) with no manual linking, providing convenience in any job setting. Eliminates weld defects caused by dirty or unreliable power.

Control display for easy reference of weld parameters.

Parameter flexibility allows the system to be set for voltage and wire feed speed control, or for voltage and amperage control.

Genuine Miller® Accessories

**Consulting Services**

**Field Application Support** 195480
Auto-Continuum™ systems may require factory-trained technical support, depending on the complexity of the application and the local availability and capability of qualified welding engineers or technology experts. Contact the factory with questions. Factory support is available at a flat rate of $1,263.00 per day (plus expenses) when scheduled more than 10 days in advance. With less than 10-day notice, rates may be higher. Rates are based on a 10-hour day, including travel. One day minimum.

**Auto-Continuum with DeviceNet**

**DeviceNet Communication Cables**
300020 9 ft. (2.7 m)
300021 20 ft. (6.1 m)

**Auto-Continuum Digital Peripheral Cable**
301104 20 ft. (6.1 m)

**Auto-Continuum Analog**

**Analog Receptacle Kits**
194793 ABB®
194791 FANUC®
194790 Motoman®
300056 Panasonic®
195002 Universal

*One required per machine. 12-inch (305 mm) length. For analog communication with robot controls via 72-pin Harting connector on Auto-Continuum.*

**DeviceNet to Analog Adapter** 301427 Field
Adapts DeviceNet to analog communication. Includes 9-foot (2.7 m) DeviceNet communication cable.

**Analog Robot Simulator** 195030
Device simulates the analog commands of typical robots. It can be used as a diagnostic tool to determine power source functionality and isolate, power source or cable issues.

**For All Auto-Continuum Models**

**ADAM DI/O Module** 300803
Provides a digital I/O interface for communication between a robot/PLC and Auto-Continuum power supply. The interface allows for the interaction of a robot or PLC and the Insight Centerpoint™ application. This module is required for all DeviceNet and analog Auto-Continuum models to run Insight Centerpoint.

**Wire Drive Motor Mounting Brackets**
300013 Universal – FANUC®/KUKA®/Motoman®
301276 ABB® 1600
301277 ABB® 2600
300483 FANUC® 100 and 120 IC
301282 KUKA® KR5 HW
301275 KUKA® KR16 HW
300375 Motoman® EA1400
300376 Motoman® EA1900

**Welding Guns**
Manual — see BernardWelds.com
Automation — see Tregaskiss.com

**Motor Control Cables**
263368025 25 ft. (7.6 m)
263368050 50 ft. (15.2 m)
263368080 80 ft. (24.4 m)
263368100 100 ft. (30.5 m)

Includes overmolded connections on high-flex cables for optimal service life.

**Volt-Sense Cable** 242212050
*Replacement 50 ft. (15.2 m) cable.* One cable supplied with Auto-Continuum power source.

**Ethernet Cables**
300734 9.8 ft. (3 m)
300735 16.4 ft. (5 m)
300736 32.8 ft. (10 m)

Industrial-grade 360-degree-shielded Cat 5 Ethernet cable with conventional RJ45 overmolded four-pole connector on one end to connect to factory network, and industrial M12 overmolded connector on the other end to attach to Auto-Continuum power source. Cable supports 10/100 Mbits-per-second transmission rate.

**Continuum Feeder Base and Spool Support** 301431

**Wire Feeder Drive (Left)** 301216
Use with feeder base and spool support when converting to a manual weld system.

**Coolant Systems**

**Continuum Cooler** 301214
For use with water-cooled torches rated up to 500 amps. Integrated coolant flow switch ensures coolant is flowing in the system. The Continuum cooler mounts to the bottom of the Continuum power source. Power is supplied via an internal connection with the power source.

**Low-Conductivity Coolant** 043810
Sold in cases of four one-gallon recyclable plastic bottles. Miller coolants contain a base of ethylene glycol and deionized water to protect against freezing to -37 degrees Fahrenheit (-38˚C) or boiling to 227 degrees Fahrenheit (108˚C). Also contains a compound that resists algae growth.
**Typical Installations** (Robotic/automation pulsed MIG or conventional MIG.)

1. **Power Source**
   See page 12 for available models. Choose power source according to preferred communication protocol. Each power source includes a 50-foot (15.2 m) volt-sense cable.

2. **Robot Controller Connection (choose one)**
   - **EtherNet/IP** — Requires Ethernet cable. 16.4-foot (5 m) cable included with Auto-Continuum robotic MIG kit. See page 10 for individual cables.
   - **DeviceNet** — Requires DeviceNet communication cable. See page 10 for available cable lengths.
   - **Analog** — Requires DeviceNet to analog adapter (301427) and analog receptacle kit (see page 10).

3. **Wire Drive Motor Assembly**
   See page 9 for available drive motor options.

4. **Auto-Continuum Robotic MIG Kit**
   Includes all cables, hoses and hardware for outfitting a robot arm. See description at right for details.

5. **Motor Mounting Bracket**
   See page 10 for available brackets. Motor mounting brackets from other brands must be supplied by robot manufacturer or system integrator.

6. **Tregaskiss Robotic MIG Gun**
   Must be ordered separately. Visit Tregaskiss.com for additional torch information.

---

**Auto-Continuum Robotic MIG Kit 301455**
Kit includes the following:
- 25-foot (7.6 m) motor control cable
- 12-foot (3.7 m) motor control extension cable
- 4/0 weld cables
- 16.4-foot (5 m) Ethernet cable
- .035/.045-inch V-groove drive roll kit with guides
- 30-foot (9 m) weld wire conduit assembly
- Conduit and clamps for mounting motor control cable, weld cable and gas hose
## Ordering Information

Note: As the technological advances offered by Auto-Continuum extend beyond the capability of Auto-Axcess™ systems, the two systems are not compatible. Auto-Continuum systems are designed to allow future upgradability, to expand with your operation’s needs.
