The Continuum system delivers exceptional arc performance with less spatter and higher-quality welds on both thin and thick metals. With user-friendly controls and system modularity, Continuum will make challenging jobs easier, and improve productivity — giving you a competitive advantage.

Insight

Integrated Welding Intelligence™ solutions deliver information to measure and improve your welding operation. See page 6 for more information.
Tru-Feed™ technology provides precise feeding operation for stable arc performance.

- Low-inertia motor provides faster response for the best arc starts with the least amount of spatter.
- Balanced-pressure drive-roll design and tensioners feed wire in its truest and straightest form for consistent feedability, resulting in better welding performance.

Spring-loaded Accu-Mate™ connection aligns gun perfectly in the drive-roll carrier — preventing the gun from being pulled loose and providing consistent wire feeding.

Quick-change dual-bearing drive rolls give you more consistent wire feeding.

Drive rolls and guides are common with other Miller industrial feeders (use existing, not new parts).

Inlet guide installation is toolless.

Toolless positive-locking rotatable drive assembly allows operator to rotate the drive, eliminating severe bends in the wire feed path. This extends gun-liner life and aids in feeding difficult wires.

Display and controls for program select, volts/arc length and wire feed speed

Memory buttons for quick program recall

LCD setup screen
- For easy selection of welding processes and functions
- Industrial design, full color display

Arc control to fine tune the welding arc

Trigger hold, jog and purge buttons

Quality-engineered rear cable management protects your connections to keep you productive.

Wind Tunnel Technology™ Internal air flow that protects electrical components and PC boards from dirt, dust, debris — greatly improving reliability.

Fan-On-Demand™ operates only when needed reducing noise, power consumption, and the amount of airborne contaminants pulled through the machine.

AUTO-LINE™ Technology
Allows for any input voltage hookup (230–575 V) with no manual linking. Provides convenience in any job setting and eliminates weld defects caused by dirty or unreliable power.
**Continuum™ System Advantages**

**Intuitive user interface makes Continuum easier to use**

Simple to set up and adjust with minimal training.
LCD display shows complete words, graphics and numeric values.
Memory buttons allow weld operators to quickly and easily change programs.
Remote connection to easily view and adjust machine parameters from virtually anywhere in the world using any Web-enabled device.
Easily update firmware, configure machine settings, view diagnostics and more.
USB functionality allows custom settings to be saved on a USB flash drive for duplicating settings for a specific operator, job, or to manage fleet configurations. The USB port is also used to update software.
Ability to set locks and limits for improved quality control using webpages.

**Easy system interface and configuration via the Continuum webpage interface**

- To use the webpage interface connect to the Continuum power source one of three ways:
  - Connect to factory network via Wi-Fi
  - Connect to factory network via Ethernet cable
  - Direct connect to PC via Ethernet cable (see page 10 for recommended Ethernet cable)
- Select language preference
- Check system status and vital information
- Configure machine settings
  - Locks and limits
  - Enable programs
  - Enable processes
- Set up programs
- View productivity information and various logs
  - Resettable/lifetime arc hours
  - Error logs
  - Heat input
  - And more
- Great for validating proper system setup as well as troubleshooting issues

**Continuum grows with your business needs**

Adaptable to a variety of weld cell configurations and requirements.
Control interface can be located on the bench feeder or on the remote operator interface (ROI) (see page 11 for configurations).
Welding Intelligence: Improve your welding operations by increasing productivity, improving quality and managing costs.

Easily add processes and programs via the USB interface.
Wire feeder is easily configurable for standard spool sizes, 60-pound spools or bulk-feeding systems.
Auxiliary power outlets (factory option) for convenient operation of 120-volt electrical devices.
Continuum® System Processes

Take the performance of each process to the highest level

Accu-Pulse®
- The most popular process for majority of industrial welding applications
- Most adaptive arc on 16 gauge (1.6 mm) and thicker
- Designed for all weld positions

Versa-Pulse™
- Fast, low-heat, low-spatter process — for materials 1/4 inch (6.35 mm) and thinner
- Great for gap filling
- Shortest arc length/lowest pulse voltage for lower heat and lower spatter at higher speeds

RMD®
- Lowest heat process, best for gap handling
- Limited travel speed

MIG
- Lower spatter than traditional MIG welders
- Better arc performance with silicon bronze and coated materials

High-deposition MIG
- Higher deposition rates than standard spray transfer on thicker materials
- Designed for welding applications in which spray transfer is preferred

Ratings A, B, C, and D are relative values. An “A” rating indicates a best fit between your performance needs and process. A “blank” rating indicates that the process is not recommended for that application.

Insight Welding Intelligence™

Transform data into actionable information that drives continuous improvement. Learn more at MillerWelds.com/insight

 Insight Core™ (Standard)

Simplified, Internet-based welding information solution that reports cell productivity and weld parameter verification.
- Provides basic production metrics such as amps, volts, wire feed speed, arc on time and arc on time percentage

 Insight Centerpoint™ (Optional)

Most established, advanced solution in the industry. Provides PC-based operator feedback to detect missed welds, verify proper weld sequence and provide weld defect detection — all in real time.
- With built-in features like Part Tracking™ to detect a bad weld and built-in reporting and welding analytics tools, Insight Centerpoint can help reduce rework costs and improve quality

Cost of a missed weld or defect

Part Tracking actively detects a bad weld when it happens to reduce rework and improve quality.
- Guide new inexperienced welders through the manufacturing process by presenting them with visual work instructions, reducing training time and out-of-date work instructions
- Centerpoint can prevent the next weld from occurring if missing or out-of-spec welds are detected, to alert and direct the operator to which weld(s) are out of parameter, reducing inspection time
- Repair can be done at the weld cell before paint, final assembly, or finished product delivery, which significantly reduces the cost of rework and improves overall parts quality

Continuum Swingarc™
Boom-Mounted Wire Feeders
951635  12 ft. (3.7 m) single-wire
951636  16 ft. (4.9 m) single-wire
951725  12 ft. (3.7 m) dual-wire
Requires pipe post OR pipe post and Swingpak for mounting. See below.

Pipe Post
149838  4 ft. (1.2 m) pipe post
149839  6 ft. (1.8 m) pipe post
Required for mounting 12- or 16-foot Swingarc booms. Pipe posts have 18-inch base plates which allow the post to be bolted to floor or optional Swingpak base.

Swingpak™ Base
183997 Swingpak base
Optional base for Swingarc booms. Pipe post easily bolts to base.

12- or 16-foot booms to accommodate a wide variety of semiautomatic applications, including large weldments and hard to reach areas. Note: Dual-wire model only available with a 12-foot boom.

360-degree rotation and 60-degree lift angle maximizes your work area (16-, 24- or 32-foot diameter work area).

Unique counterbalanced boom makes it easy to raise and lower boom and automatically holds its position.

In-boom cable routing organizes hoses and cables, preventing damage and maintaining an orderly work cell.

Note: Swingarc includes 10-foot gas hose and 10-foot weld cable for the operator to hook up.
Continuum™ Packages

Steel (push-only) MIGRunner™ Packages

951671 Continuum 350 MIGRunner, air cooled
951672 Continuum 500 MIGRunner, air cooled

Packages include:
- Continuum welding power source with running gear/cylinder rack and cable hanger
- Continuum single-wire feeder
- 15 ft. (4.6 m) Bernard® BTB Gun 400 A
- 3 ft. (0.9 m) control/motor cable
- Industrial MIG 4/0 kit for single-wire feeders consisting of flowmeter regulator with 10 ft. (3 m) gas hose, 10 ft. (3 m) 4/0 feeder weld cable with lugs, and 15 ft. (4.6 m) work cable with 600-amp C-clamp
- .035/.045 in. V-groove drive rolls

Multi-material (push-pull) MIGRunner™ Packages

951781 Continuum 350 MIGRunner, air cooled
951782 Continuum 500 MIGRunner, air cooled

Packages include:
- Continuum welding power source with running gear/cylinder rack and cable hanger
- Continuum dual-wire feeder
- 25 ft. (7.6 m) XR-Aluma-Pro™ Plus push-pull gun
- 15 ft. (4.6 m) Bernard® BTB Gun 400 A
- 3 ft. (0.9 m) control/motor cable
- Industrial MIG 4/0 kit for dual-wire feeders consisting of two flowmeter regulators with two 10 ft. (3 m) gas hoses, 10 ft. (3 m) 4/0 feeder weld cable with lugs, and 15 ft. (4.6 m) work cable with 600-amp C-clamp
Bernard® Best of the Best (BTB) MIG Gun

Bernard BTB Gun 400 A Q4015VS3EML
Straight handle MIG gun ships with Continuum feeders and has the best of all Bernard options. This 400-amp, air-cooled MIG gun is recommended for heavy manufacturing environments and features a fixed 60-degree neck with aluminum armor. It has an ergonomic handle with rubber grip and rear ball and socket swivel to maximize comfort while welding.

Standard QUICK LOAD™ liner AutoLength™ system.
- QUICK LOAD liners require less than half the time and effort to replace (compared to conventional liners)
- The liner feeds from the front of the MIG gun — no need to remove the gun from the feeder or to cut and waste wire
- The AutoLength power pin contains a spring-loaded module that applies constant pressure on the liner, keeping it seated properly in the retaining head
- Allows for up to one-inch (2.54 cm) forgiveness if the liner is too short or moves during welding
- Reduces burnbacks and improves wire feedability by aligning wire from liner with contact tip

XR™ Push-Pull Guns (ONLY for use with left-hand drive of dual-wire bench feeders.)

XR-Aluma-Pro® Plus Guns
300000001 15 ft. (4.6 m), air-cooled
300001001 25 ft. (7.6 m), air-cooled
300003001 15 ft. (4.6 m), water-cooled
300004001 25 ft. (7.6 m), water-cooled

XR™-Pistol Plus Guns
300753 15 ft. (4.6 m), air-cooled
300754 25 ft. (7.6 m), air-cooled
300755 35 ft. (10.6 m), air-cooled
300757 25 ft. (7.6 m), water-cooled
300758 35 ft. (10.6 m), water-cooled

Available in air- or water-cooled versions in multiple lengths for extended reach with trouble-free, reliable feeding.

Aluminum-series-specific tension setting ensures smooth wire feeding performance with 4000 or 5000 series aluminum wires.

Replaceable feed cable liner is designed to provide consistent arc performance. It also reduces parts cost and service time by allowing a simple means of removing and replacing liner and not the complete feed cable.

Easy-to-rotate self-seating head tube allows for better access into tight spots, providing excellent current transfer.

Isolated common knurled drive roll helps reduce wear, reducing down time and cost.

Serviceability. These guns feature a full length Velcro-seamed leather jacket with integrated strain reliefs for easy cable maintenance and protection. Additionally, the Aluma-Pro Plus guns feature quick connections between the control cable and electrical components (trigger, motor, potentiometer).

Certified by Canadian Standards Association to both the Canadian and U.S. Standards. Conforms to European standards.

Note: XR-Aluma-Pro Plus and XR-Pistol Plus guns are only compatible with MPA Plus feeders and the left-hand drive of Continuum dual-wire bench feeders.
Genuine Miller® Accessories

Continuum™ Running Gear/Cylinder Rack 301264
Small footprint and easily maneuverable, with cylinder rack low enough that you do not have to lift bottles.

Industrial MIG 4/0 Kit 300390 For single-wire feeders
300957 For dual-wire feeders
Consists of flowmeter regulator with 10-foot (3 m) gas hose, 10-foot (3 m) 4/0 feeder weld cable with 600-amp C-clamp. Dual kit comes with two flowmeter regulators and gas hoses.

Hanging Bail 058435
Used for suspending feeder over work area.

Spool Covers
274613 Left cover
274611 Left case
276961 Right cover
276962 Right case

Continuum Control/Motor Cables
263368003 3 ft. (0.9 m)
263368015 15 ft. (4.6 m)
263368025 25 ft. (7.6 m)
263368050 50 ft. (15.2 m)
263368080 80 ft. (24.4 m)
263368100 100 ft. (30.5 m)
Connects power source to feeder or remote operator interface. Also connects remote operator interface to remote motor drive.

Volt-Sense Cables
242212025 25 ft. (7.6 m)
242212050 50 ft. (15.2 m)

Ethernet Cables
300734 9.8 ft. (3 m)
300736 32.8 ft. (10 m)
Ethernet cables with M12/RJ45 connectors. Connects power source to Ethernet port of PC or network. For use with webpages and Insight Centerpoint™.

Coolant Systems
Continuum Cooler 301214
For use with water-cooled torches rated up to 500 amps. Integrated coolant flow switch ensures coolant is flowing in the system. The Continuum cooler mounts to the bottom of the Continuum power source. Power is supplied via an internal connection with the power source.

Low-Conductivity Coolant 043810
Sold in cases of four one-gallon recyclable plastic bottles. Miller coolants contain a base of ethylene glycol and deionized water to protect against freezing to -37 degrees Fahrenheit (-38˚C) or boiling to 227 degrees Fahrenheit (108˚C). Also contains a compound that resists algae growth.

Drive Roll Kits and Guides
Select drive roll kits from chart below according to type and wire size being used. Drive roll kits include four drive rolls, necessary guides and feature an anti-wear sleeve for inlet guide.

Typical Continuum™ Installations

Standard installation

1. Continuum power source
2. Continuum control/motor cable (one required)
3. Continuum feeder

Single-wire model with Bernard® BTB MIG gun
Dual-wire model with Bernard® BTB MIG guns

Swingarc boom-mounted installation

Accommodates a wide variety of semi-automatic applications, including large weldments and hard-to-reach areas.

1. Continuum power source
2. Continuum control/motor cable (one required)
4. Pipe post and optional Swingpak™ base*
5. Continuum Swingarc with Bernard® BTB MIG gun

*Pipe post (bolts to floor or Swingpak base) is REQUIRED for Continuum Swingarc. Pipe post and optional Swingpak base must be ordered separately. See page 7 for more information.

Remote drive motor installation

Ideal for fixed automation and boom applications where the wire drive motor is installed/controlled remotely.

1. Continuum power source
2. Continuum control/motor cable*
3. Remote operator interface (ROI)
4. Remote motor drives
5. Bernard® BTB MIG guns
6. Single-wire model
7. Right-hand drive
8. Bernard® BTB MIG guns
9. Dual-wire model
10. Right-hand remote motor drive
11. Bernard® BTB MIG gun

*Single-wire remote drive installations require two total control/motor cables. Dual-wire remote drive installations require three total control/motor cables.
