Rated: 3/16-inch carbons, Capable: 1/4-inch carbons

Generator Power Output Rated at 104°F (40°C)
12,000 watts peak, 10,500 watts continuous

Excel™ Power (Recommended option)
2,400 watts (120 V, 20 A) 60 Hz pure sine power***

*With wire feeder.
**With ArcReach Smart Feeder only.
***Engine speed rpm may vary while welding.

Pipe

Trailblazer welder/generators deliver unbeatable arc performance providing the smoothest, most stable arc in the industry.

The Trailblazer exclusive technologies — Auto-Speed™ and optional Excel™ power — deliver superior runtimes, increased fuel efficiency, and improved welder/generator performance.

No other compact machine in the 300-amp class delivers more welding power or more auxiliary power with better fuel efficiency and less noise — for productive, profitable, quieter jobsites.

DYNAMIC DIG
Optimized arc control for stick welding applications. See page 2.

WIRELESS INTERFACE CONTROL
Full control of your machine in the palm of your hand. See page 2.

Trailblazer 325 Diesel with ArcReach and optional wireless interface control and Excel power shown.

TRUEBLUE® 3YWARRANTY
Welder/generator is warranted for three years, parts and labor. Engine is warranted separately by the engine manufacturer.

Trailblazer welder/generators deliver unbeatable arc performance providing the smoothest, most stable arc in the industry.

The Trailblazer exclusive technologies — Auto-Speed™ and optional Excel™ power — deliver superior runtimes, increased fuel efficiency, and improved welder/generator performance.

No other compact machine in the 300-amp class delivers more welding power or more auxiliary power with better fuel efficiency and less noise — for productive, profitable, quieter jobsites.

DYNAMIC DIG
Optimized arc control for stick welding applications. See page 2.
Trailblazer® Technologies

Dynamic DIG™ technology

Ultra-adaptive arc control. Unlike conventional DIG that provides a preset amount of short-clearing current, Miller-exclusive Dynamic DIG technology works on a time-based algorithm that automatically adjusts the amount of current required to clear a short. Delivers a smoother more consistent arc that can be tailored to match application, material, fit-up and welder technique.

Auto-Speed™ technology

Matches engine speed to load — a Miller exclusive. Get the welding power you need — plus reduced fuel consumption and lower noise levels for a more profitable jobsite.

Auto-Speed technology responds to weld requirements by automatically adjusting engine speed to one of five rpm levels so the engine never works harder than necessary. Weld up to 135 amps while the engine remains at idle (1,800 rpm), saving up to 15 percent in fuel over competitive units, and drastically reducing jobsite noise.

Excel™ power (option)

Power at idle — a Miller exclusive. Unlike competitive machines that provide auxiliary power only at 3,600 rpm (max), Excel power delivers a full 2,400 watts (20 A) of 120-volt inverter-based, pure sine-wave power at 2,400 rpm. With Excel power you can operate jobsite tools like grinders at quiet, fuel-saving speeds.

Refueling time and operating costs are reduced with Excel power, which means more productivity and profitability. Plus everyone on the jobsite gets a better working environment because noise levels and exhaust emissions are lowered. Excel power — available only from Miller.

 arcs Reach® technology

Parameter control at the wire feeder or pendant without needing a control cord. An ArcReach system allows you to change weld settings from your ArcReach feeder or Stick/TIG remote, saving a trip to the power supply.

Wireless interface control (option)

Get full control of your machine in the palm of your hand so you can work hassle free.

With wireless interface control, you can change welding processes, adjust parameters, select and save preset programs, turn the machine on/off, get service reminders and more from wherever you are on the jobsite. Extend time between fill ups and maintenance intervals while eliminating the need to go back to your machine to make adjustments.

Wireless interface control is a factory-installed option available on the Trailblazer 325 Diesel.

ArcReach technology uses the existing weld cable to communicate welding control information between the feeder or Stick/TIG remote and the power source. This technology eliminates the need for control cords, and their associated problems and costs.

VIEW STATUS
View engine status, fuel level, and battery charge level of remote.

SELECT PROCESSES
View and select between all available processes.

CONTACTOR ON/OFF
Turn contactor on/off manually in remote welding mode.

ENGINE ON/OFF
Turn engine on/off with remote.

CUSTOM PROGRAMS
Save custom presets in up to four programs and easily switch between pre-programmed settings.

FINE-TUNE ARC
Quickly adjust and save arc control settings including DIG, DIG range inductance and Auto-Stop.

AMP/VOLT ADJUST
Adjust amperage or voltage, by increments or percentage, while welding.
### Trailblazer® Benefits

#### Quieter jobsites
Quieter jobsites are more productive because work crews can communicate easier, and work can start earlier and end later — even in noise-sensitive areas. Miller-exclusive Auto-Speed technology makes this welder/generator the quietest Trailblazer diesel yet — rated at 70 db at idle (1,800 rpm). If your jobsite needs a welder/generator, it needs a Trailblazer welder/generator — because no other diesel-fueled choice in this category is as quiet.

Optional wireless interface control makes it easy to shut off the machine remotely when it’s not in use, so you can lower noise levels and hear what’s going on around you.

#### More portable, uses less truck and jobsite space
Trailblazer welder/generators use up to 24 percent less cubic space and weigh up to 10 percent less than other welder/generators in their class — which means moving them is faster and easier, for maximum productivity. And because they take up less space, Trailblazer welder/generators let work trucks carry more equipment and gear — so your work crews can be ready for anything.

#### Unbeatatable arc performance
Wide amperage output with better welding deposition rates means you can get jobs done faster, saving time and money. The Trailblazer also has precise arc control, which allows you to fine-tune the arc to match your personal preferences and quickly dial in the perfect parameters to optimize weld quality and maximize productivity across a variety of applications and welding processes.

#### Fewer refueling trips
No other diesel welder/generator in the 300-amp class lets your crews spend more time working and less time refueling — because only Trailblazer welder/generators provide Auto-Speed technology, plus the Excel™ power option, to deliver maximum runtime. With optional wireless interface control, you can instantly turn your machine off when needed to save you even more fuel.

#### Maximum cost savings
Less money spent on fuel means more profit for you. Every Trailblazer welder/generator has fuel-saving Auto-Speed technology; add optional Excel power to save even more on fuel costs and enjoy a combination of advanced, profit-enhancing features that are only available on a Trailblazer welder/generator.

Maximize your savings with optional wireless interface control which allows you to turn your machine off remotely, saving you more money on fuel.

Mounting Specifications

![Mounting Specifications Diagram]

A. 20 in. (508 mm)  
B. 16.5 in. (419 mm)  
C. 1.75 in. (44 mm)  
D. 6.062 in. (154 mm)  
E. 32.75 in. (832 mm)  
F. 45.375 in. (1,153 mm)  
G. .406 in. (10.3 mm) diameter
1. Self-calibrating digital meters with SunVision™
   - Preset and actual amperage/voltage
   - Process settings
   - Maintenance functions: hour meter, oil change interval, rpm

2. Weld process selection switch

3. Pushbutton main control knob used for adjusting amperage/voltage, adjusting arc control, and accessing the service menu.

4. Adjustable arc control adjusts DIG when process control is in stick modes and adjusts inductance when process control is in FCAW or MIG modes. The amount of DIG determines how much amperage (heat) varies with stick arc length. Inductance determines the "wetness" of the weld puddle.

5. Maintenance interval reminder. Yellow and red indicator lights let an operator know when the machine is approaching, and finally in need of routine maintenance.

6. Front-panel fuel-gauge LEDs indicate fuel level. Low fuel shutdown automatically detects and shuts engine off prior to running out of fuel.

7. Standard 14-pin receptacle for simple connection of remote controls and wire feeders. Includes Auto Remote Sense™ which automatically switches from panel to remote amperage/voltage (A/V) control with remote connected. Eliminates confusion of a panel/remote switch.

8. USB port allows software updates from a USB drive. A summary file of recoded data from the unit will be saved to a USB drive that is inserted.

9. Engine control. Run/idle position adjusts engine to run at lower speeds depending on total power needed for welding.

10. Glow plugs assist in cold weather starting.

11. Weld output terminals

12. Optional Excel™ power (factory option, see page 8) provides pure generator power at 2,400 rpm and while welding. Note: If Trailblazer is ordered without Excel power option, unit is shipped with two 20 A, 120 V duplex receptacles with circuit breakers and ground fault.

13. 50 A, 120/240 V receptacle with circuit breaker

   Note: For matching plug, order 119172.
**Genuine Miller® Options** • Available as factory option. See ordering information on back page.

**SuitCase® 12RC Wire Feeder** 951580 Lightweight and flexible enough to run wires up to .062-inch diameter. Includes remote voltage control, drive roll kit and Bernard® BTB Gun 300 A. See literature M/6.5.

**ArcReach® Smart Feeder** 951733 For use with ArcReach models only (see page 2 for more information). Includes drive rolls and Bernard® PipeWorx 300-15 MIG gun. For MIG, FCAW, and advanced RMD® and pulse processes. See literature M/6.55.

**Spoolmatic® 30A Spool Gun** 130831 Air-cooled, 200-amp, one-pound spool gun for aluminum MIG. See literature M/1.73. Requires WC-24 Control (137549).

**XR™ Wire Feeders and Guns** Push-pull system designed to handle difficult-to-feed soft alloy wires such as aluminum. See literature M/1.7 through M/1.74.
**Stick (SMAW) Welding**

**Weld Leads**

- **2/0 Stick Cable Set, 50 ft. (15 m) 173851**
  Consists of 50-foot (15 m) 2/0 electrode cable with holder, and 50-foot (15 m) work cable with clamp. 350 A, 100% duty cycle.

- **2/0 Stick Cable Set, 100/50 ft. (30.5/15 m) 043952**
  Consists of 100-foot (30.5 m) 2/0 electrode cable with holder, and 50-foot (15 m) work cable with clamp. 300 A, 100% duty cycle.

**AC TIG (GTAW) Welding**

- **Dynasty® 210 Series**
  For portable AC/DC TIG. See literature AD/4.81.

**Plasma Cutting**

- **Spectrum 375 X-TREME and 625 X-TREME shown.**

- **Spectrum® 375 X-TREME** 907529
  See literature PC/9.2.

- **Spectrum® 625 X-TREME** 907579
  See literature PC/9.6.

- **Spectrum® 875 907583**
  See literature PC/9.8.

  The Spectrum 375 X-TREME and 625 X-TREME come complete with protective X-CASE™ (not shown).

**Remote Solutions**

- **ArcReach® Stick/TIG Remote 301325**
  When paired with an ArcReach power source, provides remote control of the power source without a control cord — saving time and money. See literature AY/14.5.

**Wireless Remote Hand Control 300430**

- For remote current, voltage and contactor control. Receiver plugs directly into the 14-pin receptacle of Miller® machine.

- Up to 300-foot (91.4 m) operating range.

**RHC-14 Hand Control 24221020**

- Miniature hand control for remote current and contactor control.
  Dimensions: 4 x 4 x 3.25 inches (102 x 102 x 82 mm).

  Includes 20-foot (6 m) cord and 14-pin plug.

**PRHC-14 Hand Control 195511**

- Complete current or voltage control brings 120 volts GFCI power to work area in a single cord. Housed in a durable, light aluminum case and includes 125-foot (38 m) cord with plugs.

**Extension Cables for 14-Pin Remote Controls**

- **25 ft. (7.6 m) 242208025**
- **50 ft. (15.2 m) 242208050**
- **80 ft. (24.4 m) 242208080**

**Remote Output Panel Kit 951850**

- If your welder/generator is mounted on a truck, easily locate the outputs at the point of use with the auxiliary power and weld output remote panel. See literature AY/20.5.

**Trailers and Hitches (Note: Trailers are shipped unassembled.)**

- **HWY-Mid Frame Trailer 301438**
  1,424-pound (646 kg) capacity highway trailer with welded steel tubing frame, heavy-duty axle with roller bearing hubs and leaf-spring suspension. Includes jack stand, fenders, lights, and dual hitch with 2-inch (50 mm) ball hitch and 3-inch (76 mm) lunette eye.

**Genuine Miller® Accessories (Continued)**

**2-In-1 Document/ Fire Extinguisher Holder 301236**

- Stores documents and holds a five-pound fire extinguisher.

  Note: Holder shown mounted on trailer. Fire extinguisher not included.

**Cable Tree 043826**

- Provides an area to conveniently wrap weld cables and extension cords.

**Trailers and Hitches Specifications (Subject to change without notice.)**
