## Quick Specs

**Easy to use.**
1. Turn power on.
2. Select process: AC TIG, DC TIG, DC stick or MIG (spool gun).
3. Set amperage or voltage based on material thickness.
   Then weld! It’s easy as 1, 2, 3.

**Pro-Set™ (TIG)** eliminates the guesswork when setting weld parameters. Use Pro-Set when you want the speed, convenience and confidence of preset controls. Simply select the feature and adjust until Pro-Set appears on the display.

**AC balance (TIG)** control provides adjustable oxide removal which is essential for creating the highest quality aluminum welds.

**Pulse (TIG).** Pulsing can increase puddle agitation, arc stability and travel speeds while reducing heat input and distortion.

**Auto-Set™ (MIG)** automatically sets your welder to the proper parameters. Simply set the wire size, material thickness, and shielding gas, and you’re ready to weld.

**DIG (stick)** control allows the arc characteristics to be changed for specific applications and electrodes. Lower the DIG setting for smooth running electrodes like E7018 and increase the DIG setting for stiffer, more penetrating electrodes like E6010.

**Multi-voltage plug (MVP™)** allows for connection to 120 or 240-volt receptacles without tools by choosing the plug that fits the receptacle and connecting it to the power cord.

**Fan-On-Demand™ power source cooling system** operates only when needed, reducing noise, energy use and the amount of contaminants pulled through the machine.

**Power source is warranted for three years, parts and labor.**

Original main power rectifier parts are warranted for five years.

---

**Comes complete with:**
- Power source with 10 ft. (3 m) power cord and MVP™ plugs for 120 V and 240 V

- RFC-14 HD foot control with 20 ft. (6 m) cord (194744)
- Electrode holder with Dinse-style connector
- Work clamp with 12 ft. (3.7 m) cable and Dinse-style connector
- Flow gauge regulator with hose
- Factory-installed running gear with EZ-Change™ low cylinder rack

- 4-14 pin connector
- Flow-thru Dinse-style connector

**Allows for any input voltage hookup (120–240 V) with no manual linking, providing convenience in any job setting. Ideal solution for dirty or unreliable power.**

**Update and expand.** Front panel memory card data port provides the ability to easily update software and expand product features. Visit MillerWelds.com/TIGSoftware for the latest software updates and expansions.

**Low power draw.** Inverter-based power source provides full welding output from 240 volts while drawing less than 30 amps.
