Powering a heating revolution — for preheat of moving parts up to 315 degrees Celsius (600°F).

The ProHeat 35 rolling induction system is a simple and cost-effective heating solution which delivers fast and consistent heat for pipe fabrication shops that weld pipe spools for the refinery, petrochemical, power and HVAC industries.

Optimal consistency and quality
- The rolling induction system eliminates the inconsistencies and quality issues associated with open-flame-torch heating methods
- Temperature measurement allows operators to set and achieve targeted preheat temperatures easily with limited button pushing
- The travel detect system prevents hot spots by controlling output based on travel speeds and turning output off if the part is not moving

Improved safety
- Eliminates open flames, reducing burn as well as fumes and explosive gas hazards
- Direct heat transfer results in cooler shop environment that reduces operator fatigue and improves work conditions

Maximum productivity
- Quick time to temperature increases production efficiencies while reducing consumable costs and labor expenses
- Heating while rolling the pipe assembly allows for continuous fabrication
- Compact and portable to configure around various pipe sizes throughout the fabrication shop

Specially designed for heating moving parts.

ProHeat 35 power source (907690) shown with heavy-duty induction cooler (301298) and optional running gear (195436).
ProHeat 35 Rolling Induction System

ProHeat 35 Power Source
907690  400–460 V, CE
907689  460–575 V
The ProHeat 35 induction power source is equipped with a built-in temperature controller allowing for manual or temperature-based programming with an easy-to-learn operator interface. At more than 90 percent efficiency, the ProHeat 35 power source transfers more energy to the part, reducing operating costs over different heating methods. One ProHeat 35 power source can run a single or double rolling inductor setup. External cooler heat exchanger (300993) recommended when running a double rolling inductor setup.

ProHeat Rolling Inductor (shown with mounting arm)
301117  9.1-meter power cable
301263  18.2-meter power cable
Liquid-cooled induction head for use with ProHeat 35, includes thermocouple extension cable and cable cover. The optional mounting arm allows the rolling inductor to ride on the top or side of the pipe.

Heavy-Duty Induction Cooler  301298  (coolant sold separately)
The heavy-duty induction cooler is designed with an efficient fin-and-tube heat exchanger, 9.4-liter rustproof polyethylene tank, high-pressure pump and blower to yield a high cooling capacity. When using two rolling inductors on one system it is recommended to add the external cooler heat exchanger, see Additional Accessories section.

Running Gear  195436
The running gear adds to the portability of the system. The four 127-millimeter swivel casters with brakes mount to the bottom of the power source or cooler.

Infrared Sensor Connection Box  301182
Required for connecting the infrared temperature sensor to the ProHeat 35. The connection box allows for two infrared sensors to be connected to one ProHeat. Includes air regulator and filters.
ProHeat™ 35 Rolling Induction System (Continued)

Infrared Temperature Sensor 301149
Eliminate the need for constant manual monitoring. The infrared temperature sensor can read the temperature of a moving part. Set the desired preheat temperature and the system will quickly heat to that temperature and hold it. The sensor can read from 100 to 400 degrees Celsius (212–750°F). Requires infrared sensor connection box 301182.

Travel Detect System 301183
Avoid overheating — heating rates automatically adjust to varying travel speeds, and when no movement is detected the travel detect system turns off the output preventing damage to the workpiece and rolling inductor. The travel detect system can also be used for setting different heating rates based on workpiece speed of travel. Includes all cabling and mounting hardware.

Additional Accessories

External Cooler Heat Exchanger 300993
Increases the cooling capacity of the heavy-duty induction cooler. It is recommended when powering two rolling inductors on one ProHeat 35 power source.

Remote Contactor Control 043932
Remotely start and stop the heating process with this wired rocker switch remote. Includes a 7.6-meter (25 ft.) cable.

RHC-14 Remote Hand Control 242211020
6 m (20 ft.)
242211100
30.5 m (100 ft.)
Remotely adjust the heat output of the system in manual mode as well as start and stop the heating process.

RMS-14 Momentary Switch 187208
Momentary-contact switch for contactor control. Rubber-covered dome switch ideal for repetitive on-off applications. Includes a 8-meter (26.5 ft.) cable.
