**Passive Lens:** Ideal if you weld with the same shade for long periods of time

**Auto-Darkening Lens:** Ideal if you switch between shades frequently for different types of welding or welding in varied environments

**Arc Sensors:** An increased number of arc sensors makes the lens more sensitive and provides better lens response

**Viewing Area:** Larger viewing areas tend to be better for out of position or all-day use because they improve peripheral vision

**ClearLight™ 4x Lens Technology:** Advanced high-definition optics deliver a clearer, brighter, more realistic view for every stage of every weld

**AutoSense™:** Automatically sets your helmet sensitivity by sensing your welding environment

**X-Mode™:** Ideal if you frequently weld outdoors or out of position and want to ensure your lens darkens and lightens accurately

**Cut & Grind Mode:** Ideal if you frequently switch between welding, cutting or grinding

**Grind Button:** Easily transition from welding to grinding with the touch of a button

**Grind Shield:** Large clear viewing area ideal for frequent grinding and for keeping eyes protected in between welds

**InfoTrack™ Data Monitoring:** Makes it easy to track arc time and arc count for improving productivity and more accurately quoting projects

**Memory Function:** Eases switching between two preset customized memory settings

**HDV Technology:** Provides a sharp detailed view at any angle with minimal distortion

**IMPROVED!** **T94™ Series** For the professional welder.  
T94 and T94i models now feature *ClearLight™* 4x Lens Technology.
