SELECTING THE RIGHT SYSTEM

To ensure you select the right system: 1. First, select the accessories you need. 2. These accessories will then help you select the appropriate power source.

**STEP 1:** Let's start with ArcReach® Accessories

- **Yes**: Which process(es) do you use?
  - Stick/TIG
  - MIG/Flux Core
- **No**: Do you work away from the power source?
  - Yes: Not a candidate for ArcReach® technology — check out other Miller® products
  - No: What do you typically weld?
    - Structural/Ship/General Construction XMT® 350 FieldPro® (Non Polarity Reversing)
    - Process Pipe/Assembly Modules PipeWorx 350 FieldPro™
    - Mixture/Not Sure Demo

**STEP 2:** Now for the power source

- **Yes**: Do you have primary power available?
  - Yes: ArcReach®-compatible Big Blue® or Trailblazer® engine-driven products
  - No: Do you often gouge with an electrode 1/8" or bigger?
    - Yes: RMD®/Pulse ArcReach® Smart Feeder
    - No: Stick/TIG Remote
- **No**: What do you typically weld?
  - Structural/Ship/General Construction XMT® 350 FieldPro® (Non Polarity Reversing)
  - Process Pipe/Assembly Modules PipeWorx 350 FieldPro™
  - Mixture/Not Sure Demo

*The PipeWorx 350 FieldPro will be replaced with the XMT 350 FieldPro Polarity Reversing model in 2018.*
