## LED indicators

- For power, pressure, cup and temperature allowing faster troubleshooting, eliminating unnecessary downtime.

## Automatic air regulation

- Compensates for input pressure variation to provide constant recommended torch pressure for optimum cutting performance.

## Automatic gouging consumable detection

- Adjusts gas pressure to optimize performance, eliminating the need for a manual regulator.

---

**X-TREME versatility** — Auto-Line™ circuitry automatically connects to 120–240 V, single-phase power, 60 Hz, without making internal changes. (Output amperage is automatically reduced to 27 A for 120 V input.)

**X-TREME protection** — X-CASE™ provides ultimate protection and additional space for MVP adapters, consumable box, gloves, and eye protection, etc.

**X-TREME portability** — at just 21 pounds the shoulder strap allows the end user to easily move from location to location.

**Auto postflow** calculates the optimum length of postflow time to optimize consumable life and eliminate excessive air usage.

**Heavy-duty work clamp** with flexible cable and quick connect.

**LVC™ line voltage compensation** provides peak performance power under variable conditions (power fluctuations up to ±15 percent) for steady cuts and cleaner ending cuts.

**Auto-Refire™ technology** provides ultimate customer convenience by automatically controlling the pilot arc when cutting expanded metal or multiple pieces of metal. The pilot arc will switch in and out as fast as needed when cutting expanded metal and provides maximum power for cutting thicker metal — all automatically! No need for manual re-triggering which reduces user hand fatigue.

---

**Compatible with engine-driven welders.** Complete cutting capability when powered by an engine-driven welder/generator with a 240 V receptacle of 4 kW or more.

---

**Power source is warranted for three years, parts and labor. XT torch is warranted for one year, parts only.**

Mild Steel Cutting Capability (Thickness to scale.)

Cutting at 40 Amps (240 V)

<image>

1/4 in. (6.4 mm) at 64 ipm

5/8 in. (15.9 mm) at 13 ipm

Note: Recommended maximum piercing capacity for hand-held applications is 5/16 inch (7.9 mm). Maximum sever cut of 7/8 inch (22.2 mm) at approximately 5 ipm. For aluminum and other metals with high thermal conductivity, cutting capacities may be reduced as much as 30%.

Cutting at 27 Amps (120 V)

Output amperage is automatically reduced to 27 A for 120 V input.

<image>

1/8 in. (3.2 mm) at 88 ipm

3/8 in. (9.5 mm) at 15 ipm

Note: Recommended maximum piercing capacity for hand-held applications is 1/8 inch (3.2 mm). For aluminum and other metals with high thermal conductivity, cutting capabilities will be derated as much as 30%.

Rated cut capacity is based on traveling approximately 15 inches per minute to achieve a steady, precise cut. This is the key rating that should meet or exceed your typical cutting thickness requirements.

### XT40 Replacement Torches and Consumables

The XT40 can be configured for cutting at either 30 A or 40 A by installing the appropriate cutting tip and drag shield. Replacing drag shield with deflector offers improved arc visibility while maintaining 1/16-inch standoff. For gouging, replace the tip and drag shield with gouge tip and gouge shield. The rest of the XT40 consumables are common.
