**Quick Specs**

**Heavy Industrial Applications**
- Construction
- Fabrication
- Shipbuilding
- Rental Fleets

**Processes**
- MIG (GMAW)/Pulsed MIG (GMAW-P)
- Stick (SMAW)
- TIG (GTAW)/Pulsed TIG (GTAW-P)
- Flux Cored (FCAW)
- Air Carbon Arc (CAC-A)
- Cutting and Gouging

**Rack Capacity**
- Allows up to six XMT 304/350 power sources
- Allows up to four XMT 450 power sources

**Empty Rack Weight**
- 256 lb. (116 kg)

---

**One easy connection** allows up to six inverters to be connected with one primary power drop.

**Meets IP23**, which is more stringent than IP23S or IP23M ratings.

**Protected from the elements**, the electrical junction box is located well under the galvanized roof panel.

**Liquid-tight strain reliefs** provided on both welding power source and electrical junction box. Strain relief is designed to resist salt water, alcohol, oil, grease and common solvents.

**Lifting eyes simplify** transportation using crane or overhead lifting device.

**Rack roof panel and power source shelves are fabricated from galvanized steel** and painted for added protection in harsh environments.

**Rugged steer skids** stand up to the rugged construction environment.

**Lift truck side and end fork pockets** in base to enable loading and worksite repositioning with fork lift.

**Isolated work terminal** provides a convenient connection point for common workpiece construction.

**Easy power source removal from rack** with ability to wire conventional plug for applications remote from rack.

---

**XMT 350 6-Pack Rack**

**MULTIOPERATOR**
- 4 TO 6 ARCS
- Deploy multiple welding arcs with one primary power connection and one transportation move

**DURABLE**
- BUILT TO LAST
- Built to last in harsh industrial environments

**QA**
- BETTER WELDS WITH LESS REWORK
- Improved weld quality

**Warranted for 3 years parts and labor.**

The XMT 350 is a standard in the welding industry for multiprocess welding. The XMT is the most versatile package with unbeatable arc performance. It provides for CC and CV welding processes, including Stick, TIG, MIG, FCAW and Air Carbon Arc Cutting and Gouging. The XMT 350 is commonly used with the Miller® line of SuitCase® feeders to provide a reliable and durable solution for construction.

The XMT 450 is the newest addition to our line of multioperator inverter racks.

The XMT 450 provides the same multiprocess capability as the XMT 350 with the added benefit of a higher output (450 A at 100 percent duty cycle). The XMT 450 Rack is available in two primary voltages (230/460 V and 575 V). The 230/460 V model leaves the factory linked and fused for 460 operation.
